

# PARKER AG SERVICES, LLC

## *Digester Cleaning*

- Pumping the material to land-application sites, lagoons, or drying beds.
- Semi-tankers to transport the material.
- Land applying the biosolids at agronomic rates.

**P**arker Ag Services handles digester cleaning from start to finish by:

- Providing hydraulically driven pumps to mix digester contents in place, which reduces the amount of water transported.
- Providing specialized personnel to access the tank, wash it, and remove accumulated solids, grit, and debris.
